Cutting-edge Educational Technologies

“Learning best by doing. In corporate review, discussion, and hands-on experiences in my courses, including real world projects whenever possible.”
Paul Welsh, LTEC Instructor & Director of Technology & Distance Programs

Virtual Learning Environments

Our Programs:
PhD in Learning Design & Technology (LTEC)
Master’s in LTEC (campus and online)
Graduate Certificate in Online Learning and Teaching (COLT)

“LTEC completely changed my life and have kept me motivated to push forward in my academic career”
Claire Chui, LTEC PhD student & web conference support person

“LTEC is a great degree if you want to make a difference in public education; this is where the programs get developed and really make a difference in the classroom – for the students and the teachers.”
Adam Raff, LTEC (MEd 2012)

“People actually like to see the other people in the class, even if they never met them in person. That’s what the social media lacks, you know.”
Michael Marinescu, LTEC Associate Professor, UH-Waiakea

“LTEC students served on neighbor islands through distance education.”

Molokai’s 3
Kauai’s 6
Students served on neighbor islands through distance education: 2004-2014

“I’m really exploring the way open digital content free to access, new schemes, and making open technology on the web are providing access for learning opportunities to people who wouldn’t otherwise have them. I’m trying to help democratize educational globally, and I hope that emphasis in everything I do that relates to education.”
Silly Maile, LTEC (MEd 2012)
