MS KRS: Rehabilitation Counseling
48 Credits
Typical Program Length: 36 Months

The goal of the Rehabilitation Counseling specialization is to prepare rehabilitation professionals to work effectively in the rehabilitation service delivery system. Additional curriculum requirements are offered for students who are interested in a 60 credit option to pursue licensure in other states. This program of study is accredited by the Council of Rehabilitation Education (CORE).

Delivery Options
All courses in this program specialization are offered online. Fieldwork for clinical courses (e.g., practicum, internship) may be done in student’s own community (with permission of program director).
