Unit Plan Title: Composting Matters

Essential Question:

- How do we use the waste we produce at school in ways that benefit our school, community, and 'āina?

Enduring Understandings:

- Composting promotes sustainability by recycling organic matter, reducing the amount of waste that ends up in the landfill.
- Composting contributes to healthy soil and plants, by enriching soil biodiversity.
- Composting requires decomposers to break down organic matter into smaller particles.
- Students will understand that their voice can empower others to make sustainable choices.
