JOIN OUR TEAM TODAY!

Ka Pilina No‘eau II aims to improve the STEM outcomes of Native Hawaiian students, and students across ‘Oahu, in grades K-5 through the creation and implementation of culturally relevant, hands-on STEM lessons. Your work with us will help to create new, best practices for educators to be able to develop place-based and problem-based learning in their classrooms, providing meaningful education to today’s keiki!

OPEN POSITIONS:

GRADUATE ASSISTANT
(2 OPENINGS)

As a graduate assistant, you will be working with a team of faculty, other GAs, and student workers to create STEM lessons and lesson materials for students in elementary school and parent workshops. You will also help to collect data that will tell us how effective our lessons are in teaching STEM concepts to our participants and to help create change at home by helping out in our parent workshops. You will be working to teach elementary school students and high school Junior Camp Mentor interns.

If you love to create meaningful changes and impact young students in their education, believe that culturally-relevant lessons help students learn science, technology, engineering, and math better, and are eager to learn new skills, join our team today!

For minimum and desirable requirements, or if you're ready to join our team, clicking the link below!
